

AARISH

Software Engineer | Mobile & Full-Stack Developer

saifiaaarish@gmail.com • +91-9410026741 • Greater Noida, India • [linkedin.com/in/aarish-saifi-ab46a4221](https://www.linkedin.com/in/aarish-saifi-ab46a4221)

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3 years of professional experience building scalable cross-platform mobile applications and backend-integrated systems. Proficient in Flutter, Dart, Python, and C++, with hands-on experience delivering production-grade apps serving real users. Passionate about writing clean, maintainable code and solving complex engineering challenges. Aligns with Amazon's Customer Obsession principle — consistently prioritizing end-user experience and reliability in every development cycle.

TECHNICAL SKILLS

Languages: Dart, Python, C++, SQL

Frameworks: Flutter (BLoC, Cubit), REST API Integration, NextJs

Mobile Dev: Cross-platform iOS & Android, Flutter_bloc, State Management

Databases: SQLite, Firebase, MySQL

CS Fundamentals: Data Structures & Algorithms, OOP, Problem Solving, SDLC

Web Dev: HTML, CSS, JavaScript, ReactJs (Frontend Basics), NodeJs

AI & GenAI: Prompt Engineering, ChatGPT, GitHub Copilot, AI-assisted Development, Generative AI Fundamentals

PROFESSIONAL EXPERIENCE

Software Engineer – Application Developer

Feb 2025 – Jul 2026

Quant & Company | India

- Architect and develop production-level Flutter mobile applications using BLoC and Cubit state management, ensuring scalable and testable code architecture.
- Integrate RESTful APIs into cross-platform mobile apps (iOS & Android), ensuring reliable data transfer, error handling, and optimized network performance.
- Maintain and refactor legacy codebases to improve performance, readability, and long-term maintainability aligned with clean architecture principles.
- Contribute to end-to-end development lifecycle: requirement gathering, design, coding, testing, deployment, and post-release monitoring.

AI Training Contributor (Freelance)

Aug 2024 – Feb 2025

Outlier AI | Remote

- Applied knowledge of data structures, algorithms, and programming languages to assess and improve AI responses on technical tasks.
- Contributed to AI model training by writing, reviewing, and evaluating code-related prompts and responses to improve model accuracy and quality.
- Analyzed and ranked AI-generated outputs across software development topics, ensuring correctness, clarity, and alignment with engineering best practices.

Software Engineer

Oct 2023 – Jul 2024

GWS LLP | Noida, India

- Developed, maintained, and optimized scalable software applications across the full development lifecycle.
- Built application features with a strong focus on debugging, API integration, and writing clean, efficient code.
- Collaborated with cross-functional teams to deliver reliable, production-ready solutions on schedule.

Software Developer Intern

Jul 2023 – Sep 2023

Ghoul Web Solution LLP | Noida, India

- Contributed to development of web and mobile features in a team environment, gaining hands-on exposure to production codebases and agile workflows.
- Built and tested frontend components, debugged cross-browser/cross-device issues, and implemented UI improvements based on user feedback.
- Collaborated with senior developers to review code, resolve technical blockers, and deliver sprint commitments on schedule.

KEY PROJECTS

EDUIO Teacher App

Flutter • Dart • BLoC • REST API • Firebase

- Developed a comprehensive teacher-facing mobile application enabling educators to upload study materials, assign homework, and monitor student performance — used across multiple classrooms.
- Implemented real-time push notifications, attendance management, and a structured dashboard for class schedules, reducing teacher administrative overhead significantly.
- Designed a secure role-based access system ensuring student data privacy and organized record-keeping compliant with institutional standards.

EDUIO Student App

Flutter • Dart • API Integration • Secure Auth

- Built an interactive student-facing app providing centralized access to study materials, timetables, assignments, and academic updates in a single platform.
- Implemented secure authentication and data handling to protect student PII; architected the app for extensibility to support future modules (quizzes, attendance, grades).
- Focused on UX accessibility and responsiveness across Android and iOS, achieving smooth performance on low-end devices through performance optimization.

MediMate – Doctor Appointment App

Flutter • BLoC • Cubit

- Developed a doctor appointment booking application using Flutter as part of an internship learning project.
- Implemented appointment listing and booking features with BLoC/Cubit for state management.
- Integrated REST APIs to fetch and display doctor and appointment data; followed a clean project structure aligned with Flutter app development best practices.

EDUCATION

Bachelor of Technology (B.Tech)

Sep 2020 – Jun 2024

Mangalmai Institute of Engineering and Technology | Greater Noida, Gautam Budh Nagar

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Computer Networks

AKTU Roll No.: 2007861520001 • Division Awarded: I-DIV • CGPA: 7.72

CERTIFICATIONS & COURSES

- Python Programming — INCAPP
- Data Structures Using C++ — INCAPP
